

## TECHNICAL DATA SHEET

NVRL -BTV-05 -PS -001

Technical Data Sheet v3  
Product Information v1

### POSITIVE SHEEP SERUM; SEROTYPE 5; RL 23

|                                |  |
|--------------------------------|--|
| <b>Product type:</b>           | Serum  |
| <b>Immunogen:</b>              | <i>Bluetongue virus</i>  |
| <b>Immunogen serotype:</b>     | 5  |
| <b>Species of Origin:</b>      | Sheep  |
| <b>Production date:</b>        | 5th August 1989 (99 dpi)   |
| <b>Biosafety restrictions:</b> | This product has been heat-inactivated for 2 hours at 56°C .<br>This product is only for in vitro diagnostic use, suitable for use in immunoassays.<br>In house optimization will be required. |

### TECHNICAL DATA

|                               |                                 |
|-------------------------------|---------------------------------|
| <b>Unit definition:</b>       | 1 x 1ml                         |
| <b>Storage conditions:</b>    | at -20 °C or below              |
| <b>Immunogen / Animal ID:</b> | <i>Bluetongue virus</i> , RL 23 |
| <b>Immunogen serotype:</b>    | 5                               |
| <b>Immunogen genotype:</b>    | n/a                             |
| <b>Immunogen topotype:</b>    | n/a                             |
| <b>Neutralising antibody:</b> | Yes                             |

### SHIPPING CONDITIONS

|                              |                          |
|------------------------------|--------------------------|
| <b>Shipping temperature:</b> | +2 °C to +8 °C           |
| <b>IATA classification:</b>  | Non-infectious substance |

#### Notes

IATA classification Dangerous goods classification of the product according to the International Air Transport Association (IATA) regulations (<https://www.iata.org/>).
